Cardington, OH 43315

I certify this to be a true and accurate copy of the
official documents as filed in the records of the Ohio
Environmental Protection Agency.

Subject: Class B Biosolids Beneficial Use Site Transfer

By: Mike Cassifer Date: 3-23-17

Dear Mr. Ringler:

Ohio EPA received a request from Renergy, Inc. to transfer the following biosolids beneficial use site from the Upper Olentangy Reclamation Center biosolids management program to the Ringler Energy, LLC biosolids management program:

<u>Ohio EPA Site #</u>	<u>Field ID</u>	<u>Previous Field ID</u>	<u>County</u>	<u>Township</u>
21-00032	DEO-02-09	DDWT-04	Delaware	Oxford

Ohio EPA Site 21-00032 (Field ID DEO-02-09)

This 121-acre beneficial use site, owned and operated by Shady Haven Farms, LLC, is located southwest of the intersection of Steamtown Road and US 42. The beneficial use site's soil units consist of Blount silt loam and Pewamo silty clay loam. Soil analytical results indicate a pH value of 6.5 S.U. and an average phosphorus value of 29.5 parts per million (ppm) Mehlich 3 extraction.

A review of the application and site was conducted by Ohio EPA. The application indicates that the requisite notifications and consents have been obtained. The review considered soil and landscape characteristics, isolation distances from residences, geology and ground water conditions, and the proximity to waterways and wells.

After a review of the application and Ohio Administrative Code (OAC) 3745-40-06, Ohio EPA hereby authorizes this beneficial use site to be transferred to the Ringler Energy Class B biosolids management program. This authorization is subject to conditions contained in the Ringler Energy NPDES permit, OAC 3745-40 and the specific conditions outlined below. Conditions contained in the NPDES permit and OAC 3745-40 may differ. In such cases, the more restrictive conditions from either the NPDES permit or OAC 3745-40 shall govern.

Specific Conditions

1. The review indicated the presence of soils at this site that are classified as hydrologic soil group D. Please refer to the precipitation prohibitions and restrictions for group D soils found in OAC 3745-40-08(B)(2).

2. All biosolids beneficially used at this site shall be injected beneath the surface of the ground or immediately incorporated into the soil. Biosolids that remain on the surface shall be incorporated within six hours.
3. Upper Olentangy Reclamation Center is no longer authorized to beneficially use biosolids at this site.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Treasurer, State of Ohio," which the Commission, in its discretion, may reduce if by affidavit it is demonstrated that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
77 South High Street, 17th Floor
Columbus, OH 43215

If you have questions, please refer to Ohio EPA's Sewage Sludge Rules in OAC 3745-40 (<http://www.epa.ohio.gov/dsw/sludge/biosolid.aspx>), or contact Betsy VanWormer at (614) 644-2150 or via email at betsy.vanwormer@epa.ohio.gov.

Sincerely,

Craig W. Butler
Director
